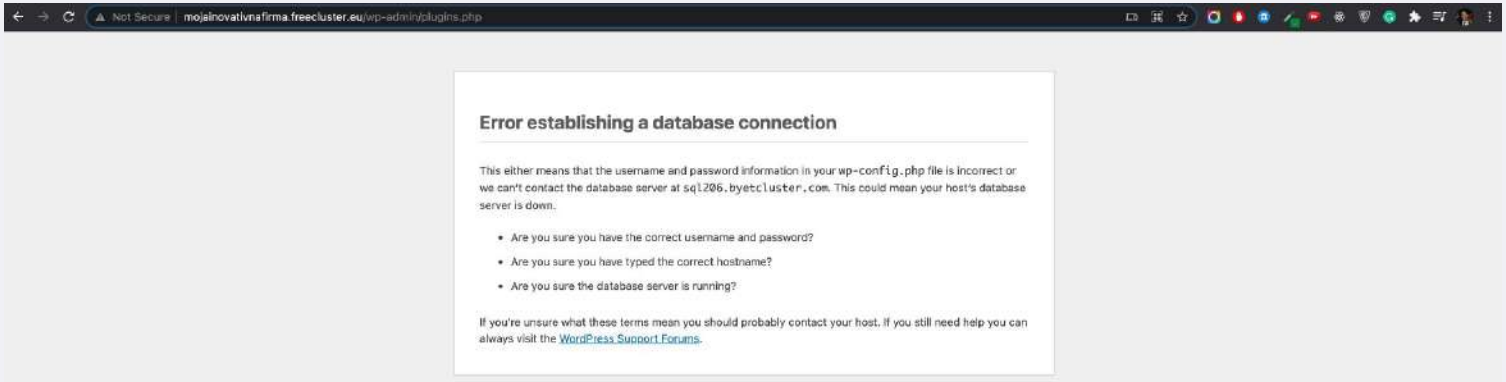
Pitanja vezana za prvi deo

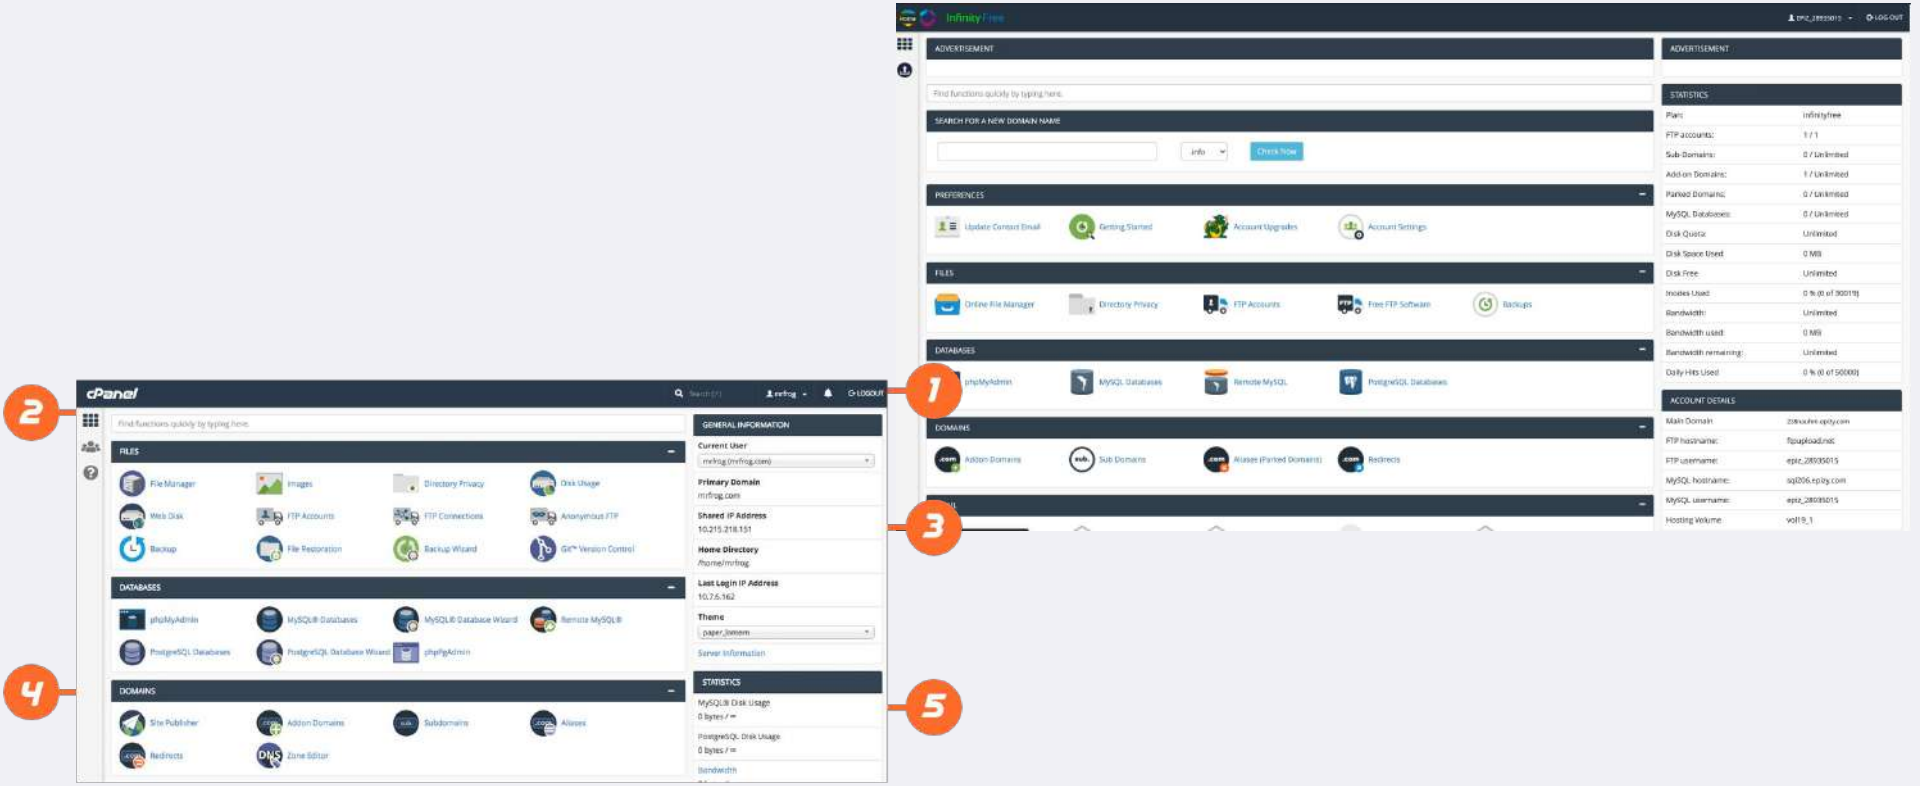
Izrada Web sajta

2. Deo 22.6.2021.

Zašto izbegavati besplatan hosting



Dobro je da Hosting ima cPanel®



Podešavanje e-mailova na Zoho platformi

https://www.youtube.com/watch?v=MzEGw3cbuEs

Preporučene Teme

Ako je tema prevdiđena za teretane, ali vam se sviđaju elementi i raspored za vaš sajt za promociju bušilica, to je sasvim u redu. Kroz zamenu slika, teksta i eventualno boja, tema se može prilagoditi.

Astra Tema sa 150 podtema i njeno korišćenje je prikazano u nastavku, za one koji žele da istražuju više i drudge teme zanimljive su (https://www.youtube.com/watch?v=WiCxBtJNdAQ, 20min):

1. Blocksy Theme: https://www.darrelwilson.com/blocksy
2. Neve Theme: https://www.darrelwilson.com/neve
3. Suki Theme: https://www.darrelwilson.com/suki
4. CosmosWP Theme: https://www.cosmoswp.com
5. Deep Theme: https://darrelwilson.com/deep-theme
6. Astra Theme: https://www.darrelwilson.com/astra
7. Phlox Theme: https://wordpress.org/themes/phlox
8. OceanWP: https://www.darrelwilson.com/oceanwp
9. Zita Theme: https://darrelwilson.com/zita
10. Zakra Theme: https://wordpress.org/themes/zakra/

Elementor plugin je odličan za one koji žele da se posvete više i dobiju potpunu kontrolu sa izgledom sajta. Dobar tutorial na domaćem jeziku: https://www.youtube.com/watch?v=O86Ff47R360 (40min)

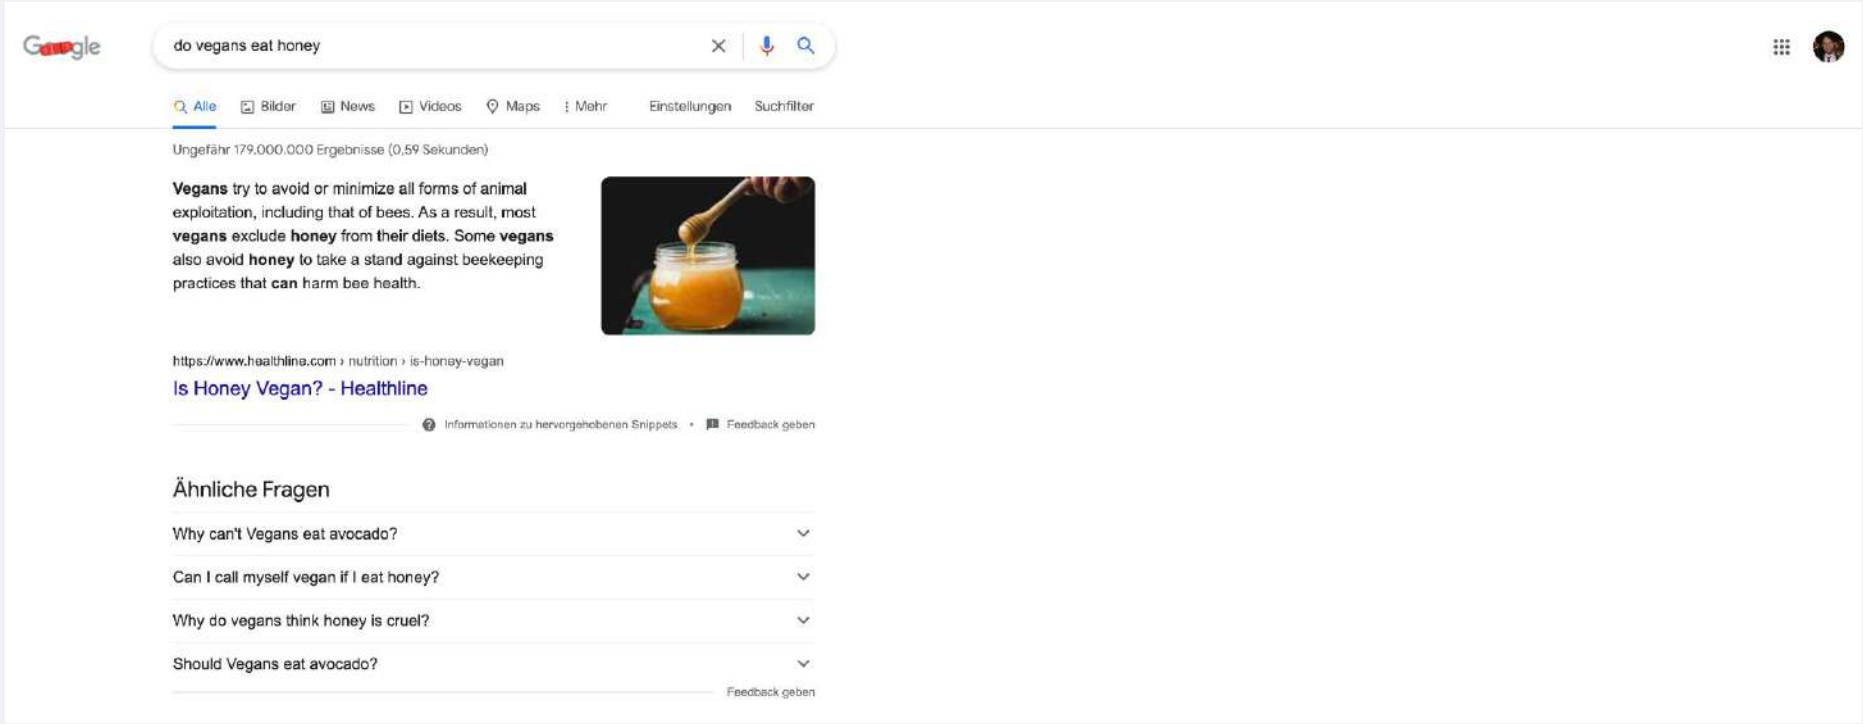
“Search engines”

Veb pretraživači

Google, Yahoo, Bing, Ecosia, DuckDuckGo

Glavna svrha - da pronađe odgovor na pitanje



Kako web pretraživači rade?

Za razliku od društvenih mreža u kojima je norma merenja uspeha merenje zadržavanja posetilaca na platformi, pretraživači imaju potpuno obrnut pristup:
Što korisnik manje vremena provede da pronađe odgovor, to se rezultati pretrage smatraju boljim.

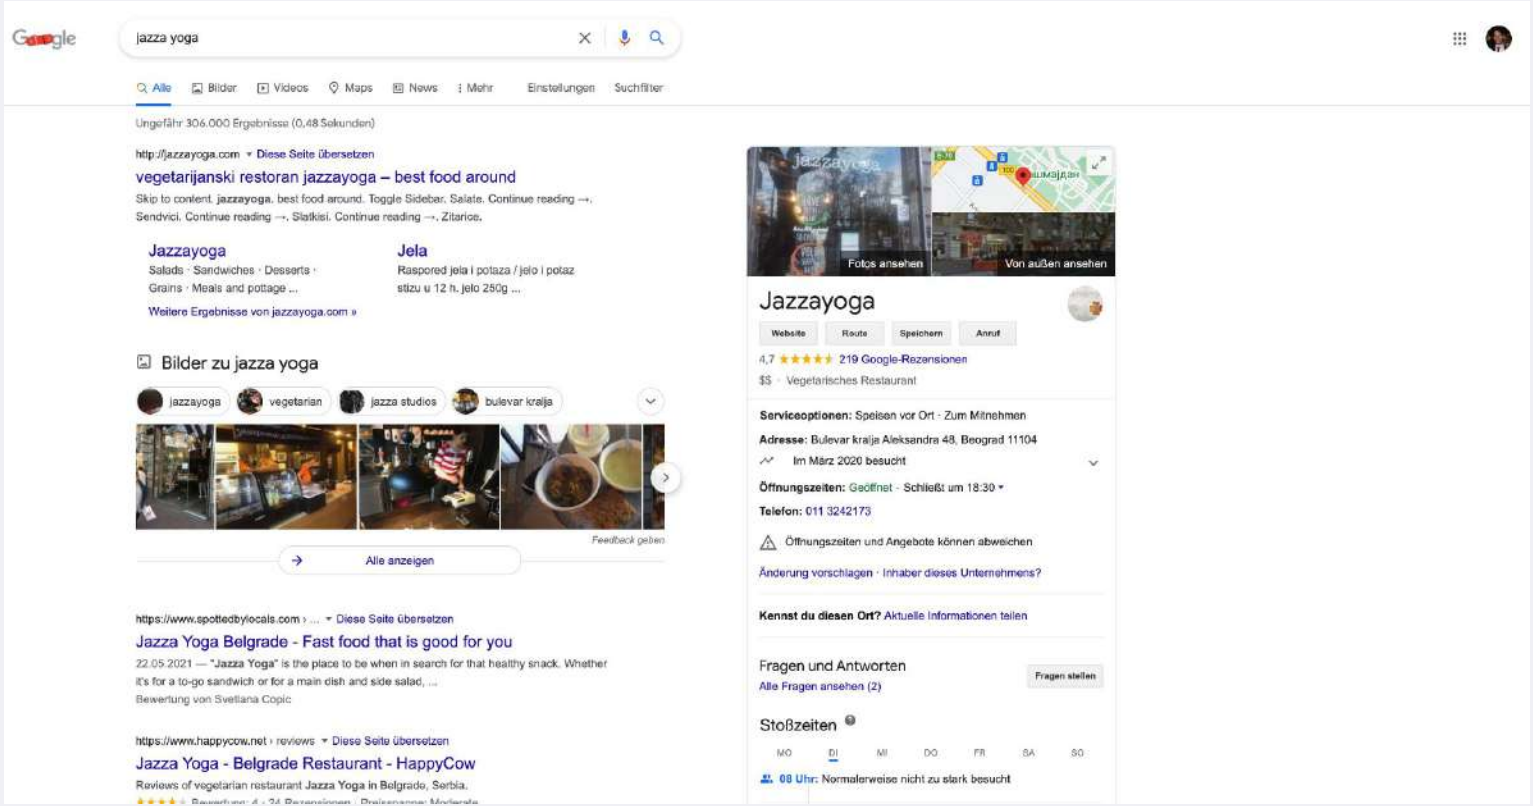
- Prvobitna klasifikacija sajta funkcioniše prema kriterijumima kao što su:
  - Tekst u linku
  - Broj ponavljanja termina u naslovu
  - Broj ponavljanja termina na stranici u tekstu
  - Domen i jezik sajta
  - Opšti sadržaj sajta

Na osnovu klasifikacije, pretraživač zna (AI) u koji obim pojmova je potrebno da stranicu rangira. Za to koristi i konstantno meri kriterijume:

- Broj linkova koji vode ka sajtu i konkretnoj stranici i odakle
- Da li je sadržaj ukraden ili dupliran sa nekog drugog sajta? Ko je prvi objavio?
- Da li korisnici biraju njega kada pretražuju neki pojam
  - Da li se ako odaberu njega vraćaju nazad na pretragu sa istom ili sličnom pretragom

Ovo su samo neki od parametara koji se koriste.

Google My Business View - https://www.google.com/business/



TEŠKO (NEMOGUĆE) JE BITI #1 MESTO U PRETRAZI AKO KORISNIKE VAŠA STRANICA NE INTERESUJE I ZA NJIH ONA NIJE NAJBOLJI REZULTAT PRETRAGE.

Na koje pretraživače treba obraćati pažnju?

Ohio sues to have Google declared a public utility

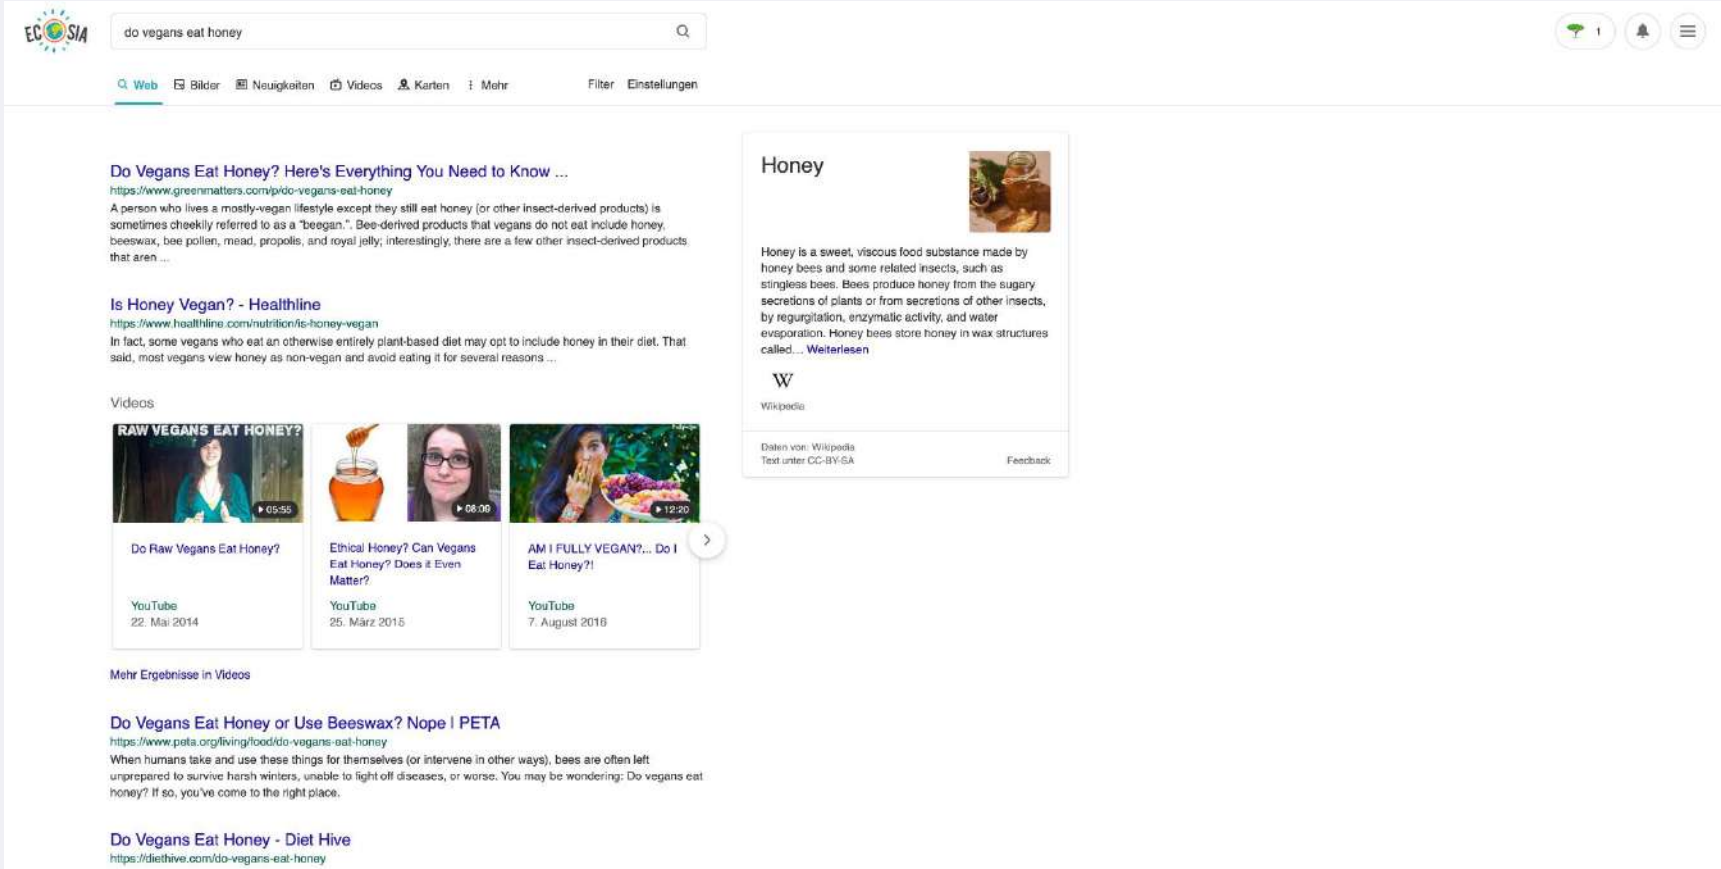
The lawsuit, which estimates that Google is used for nearly 90% of internet searches and has 95% of the search share on mobile devices, accuses Google of responding to certain search requests in a way that prioritizes Google's products even if other responses would give better answers.

Reuters • June 10, 2021, 14:08 IST

WASHINGTON: Ohio asked a court on Tuesday to declare Alphabet's Google a public utility, a step the state's Republican attorney general said would forbid the search and advertising giant from giving preferential treatment to its own products.

"When you own the railroad or the electric company or the cellphone tower, you have to treat everyone the same and give everybody access," Attorney General Dave Yost said in a statement.

Pored Gugla i na one koje koristi ciljna grupa



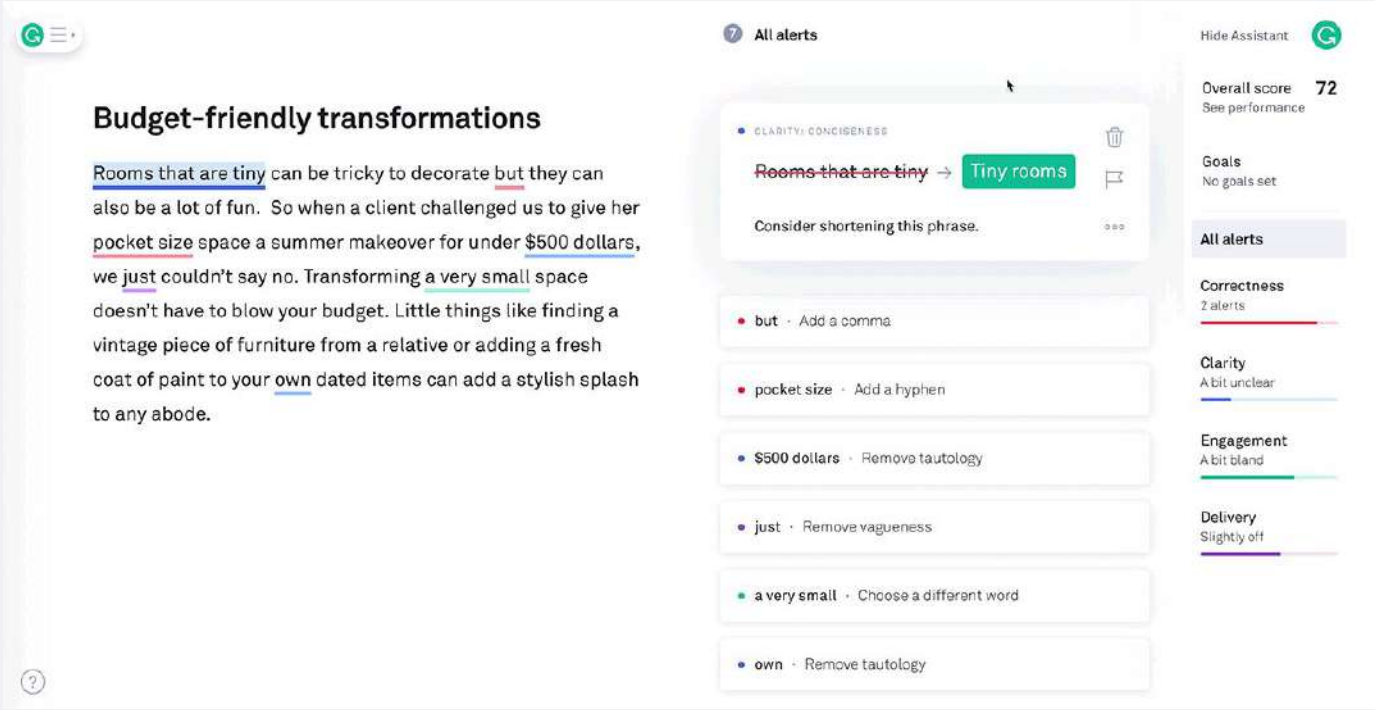
Važne stvari za pretragu

Pretraživači čitaju tekst (slike trebaju imati ALT, što je opis), naslovi su bitniji od paragrafa.

Pretraživači se kreću kroz sajt putem linkova. Svaka stranica koju želite da pretraživač nađe bi trebala da bude linkovana sa nekom drugom, odnosno da na neki način ima putanju do početne stranice.

Grammarly

Odlična nadogradnja za Google Chrome (i Microsoft office) za pisanje i uređivanje tekstova na engleskom.
https://grammarly.com



Prilagođavanje sadržaja

Uvek moramo imati u vidu:

- Da li su naši potencijalni klijenti informisani o industriji i u skladu sa tim koristiti rečnik na sajtu. **Rečnik koji koristimo je rečnik kojim oni trebaju da pretražuju da nas nađu** (i rečnik koji oni razumeju).
- Koristiti što jasnije i što jednostavnije rečenice i pojmove. Pored nas, naše tekstove trebaju da razumeju i AI pretraživači sajtova (npr. Google).
- Pravopisno i gramatički ispravan tekst, bez štamparskih grešaka.
- Jasna organizacija elemenata na stranici
- Jasna navigacija
- Jasan naziv elemenata (naslovi)

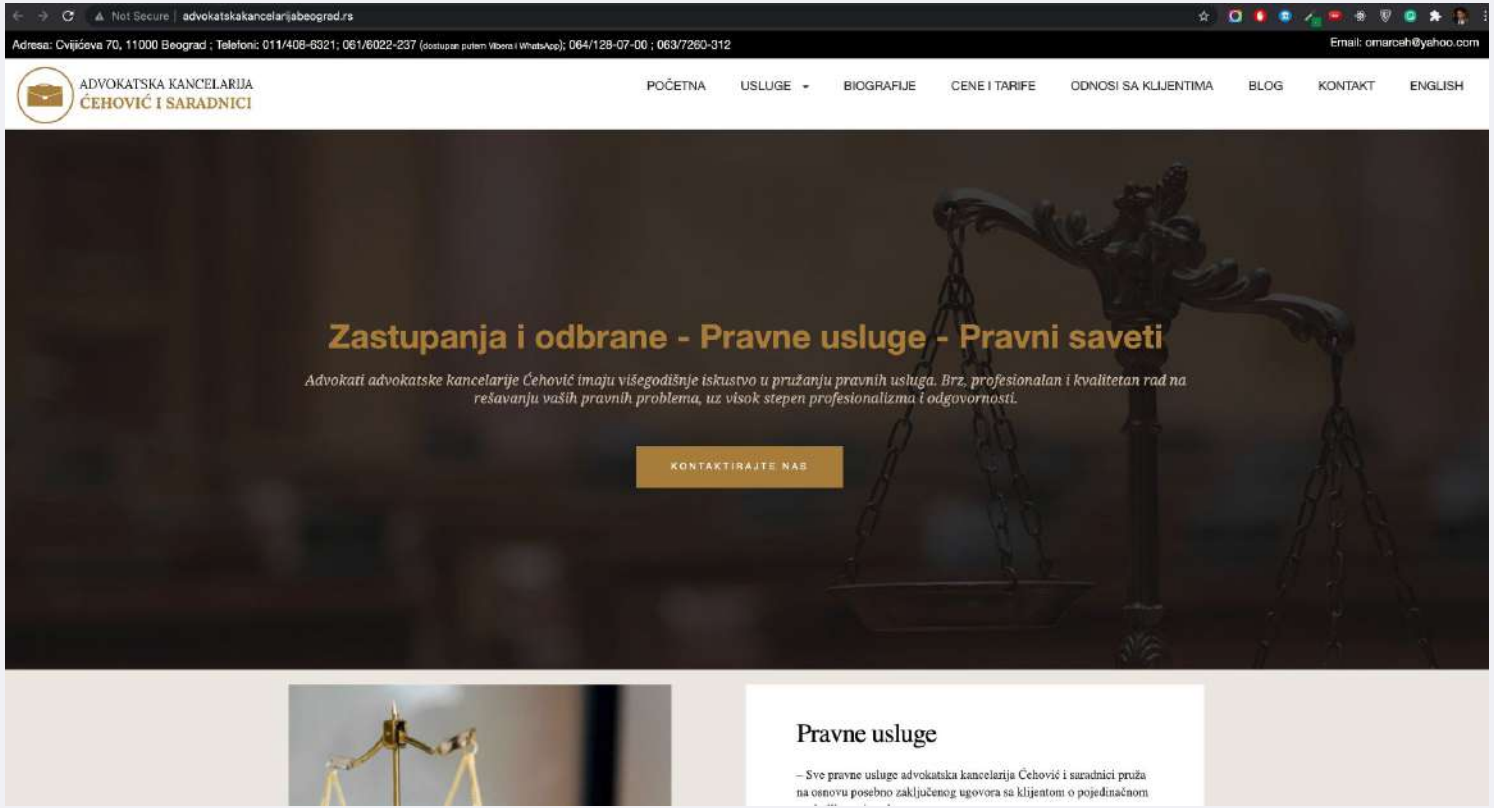
Sajt se pravi za potencijalne kupce i prilagođava se njima.
Uvek je izuzetno važno da se pregledaju sajtovi konkurencije, kao i drugi sajtovi koje ciljna grupa posećuje, da bi se analizirali elementi, rečnik, dizajn i ostalo što koriste i kako to može biti bolje kod vas.

Koje elemente treba da ima sajt?

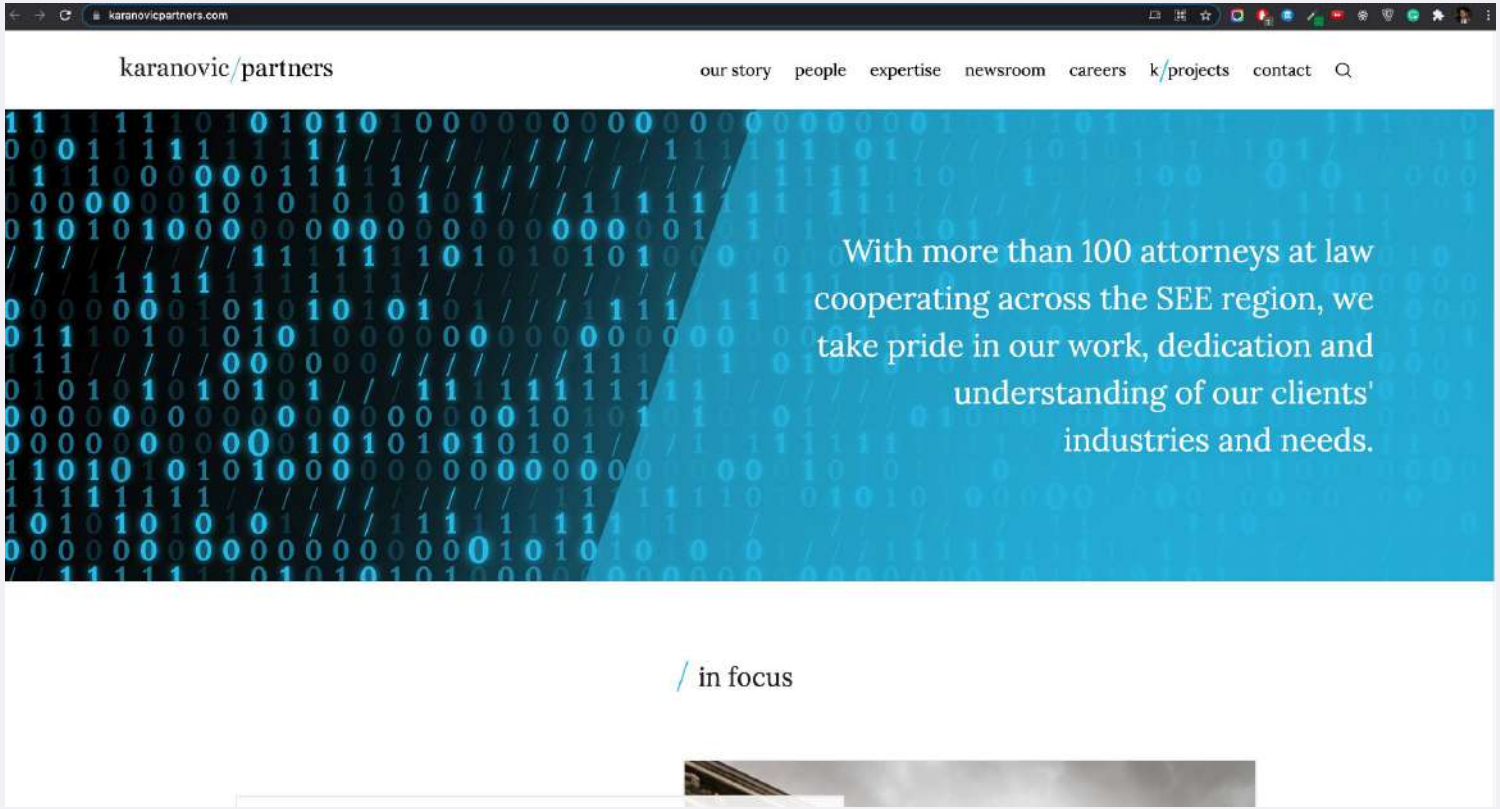
U zavisnosti od **industrije**, potrebno je da analizirate druga rešenja(i konkurenciju i kompatibilna) i da **vidite šta je** ono što je **uvek prisutno**, da izvučete zaključke i da vidite **da li je nešto potrebno dodati ili oduzeti**.

Primer: Usluga - Advokati

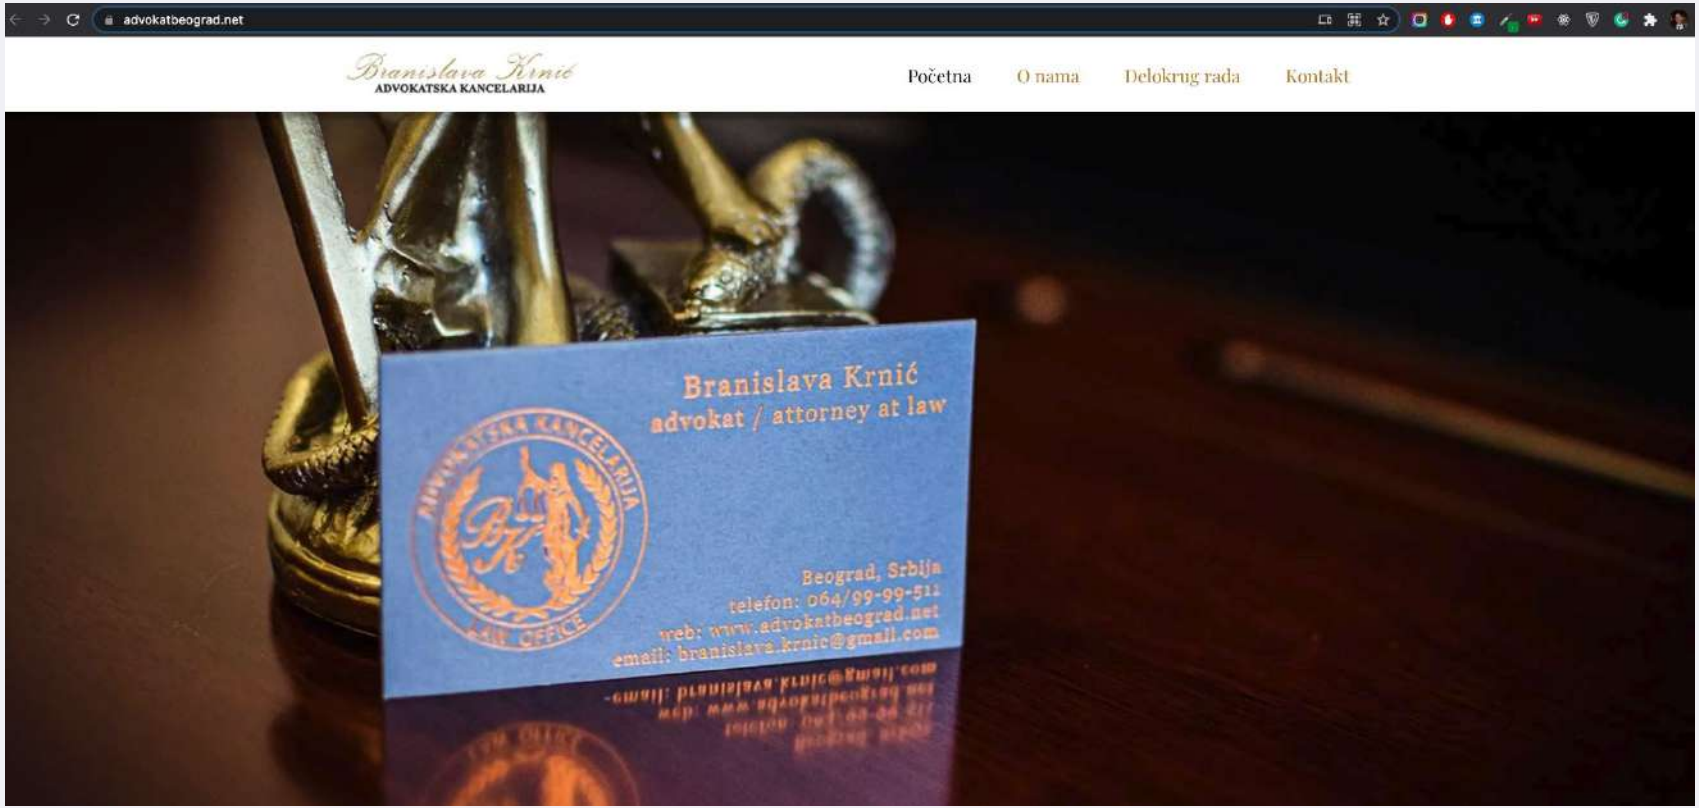
Primer: Usluga - Advokati



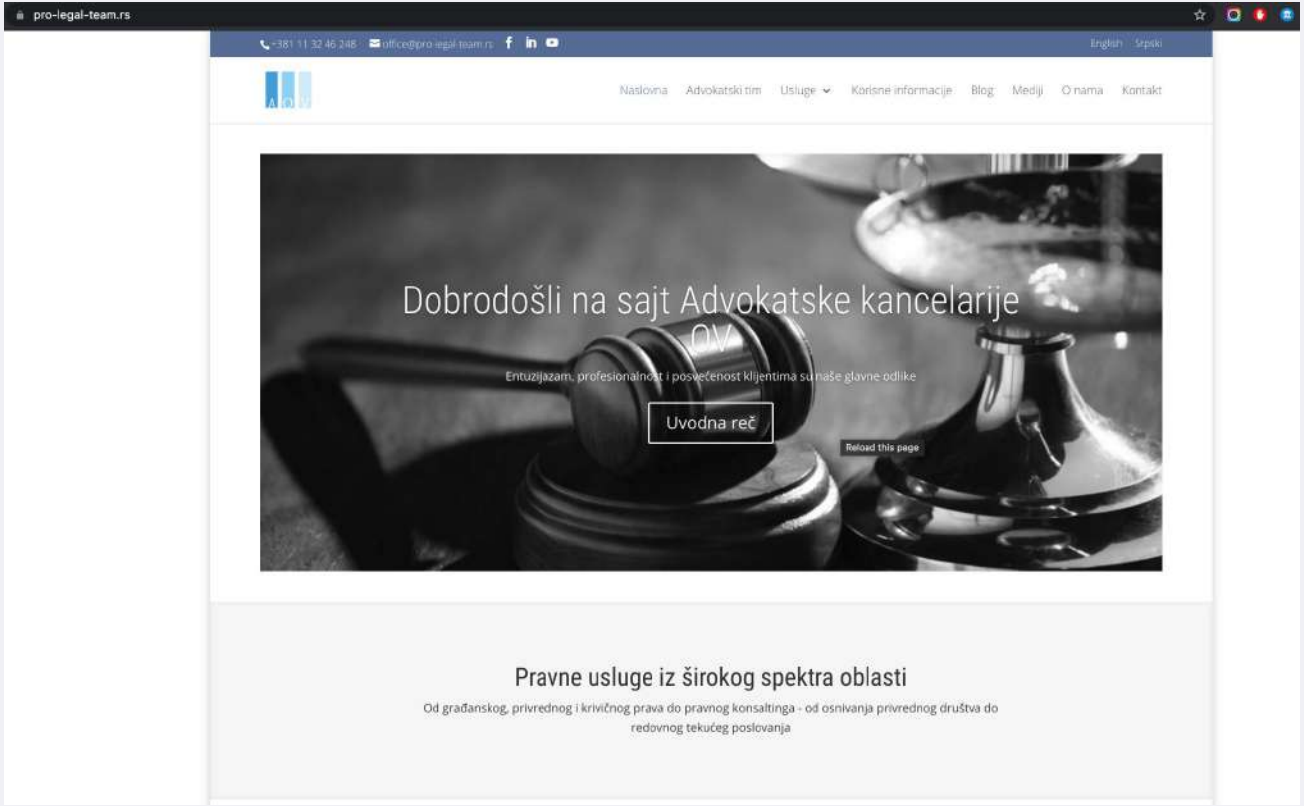
Primer: Usluga - Advokati



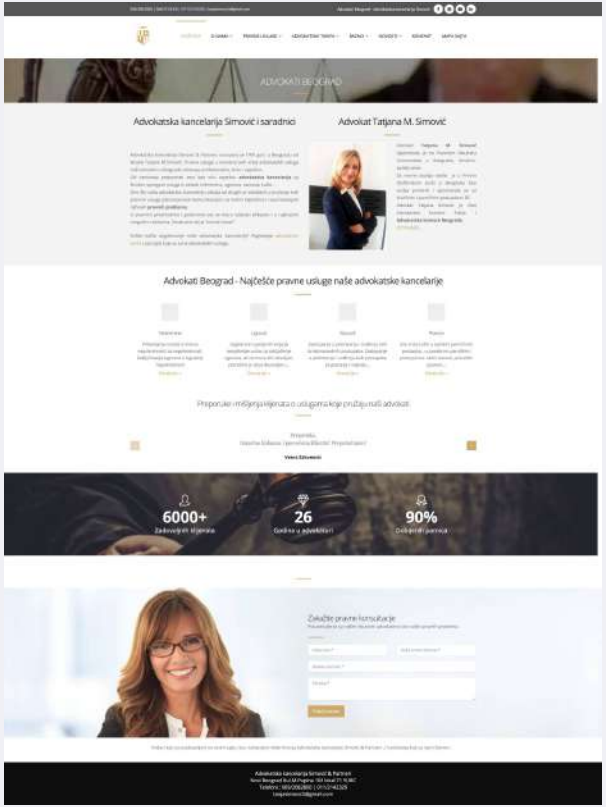
Primer: Usluga - Advokati



Primer: Usluga - Advokati



Primer: Usluga-Advokati advokatibeograd.com



Primer: Usluga-Advokati

Elementi:
- Telefon, email, na vrhu sajta
- Kontakt forma na dnu sajta
- Višejezičnost
- Rencenzije

Stranice:
- Početna sa izdvojenim isečcima
- Delokrug
- Klijenti/Reference
- Blog
- Cenovnik
- Biografije
- Kontakt

Recenzije/Reviews

- Vi kontrolišete koje ćete recenzije prikazati na svom sajtu
- Personalizujte ih što više tako da se posetilac poistoveti sa reviewerom.

Zašto koristiti blogove?

- Većina ljudi
  - ne ide po sajtovima da bi pratila novosti na njima (osim društvenih mreža i novina)
  - želi da informacije koje ih interesuju dobiju što pre i da idu dalje sa svojim životom

Čemu onda blogovi, priče o našoj firmi i industriji?

- Bolja rangiranost na pretragama
- Da bi bili odgovor na pitanja koja vaši potencijalni klijenti postavljaju

Saznajte šta potencijalni kupci pretražuju

Pravite postove na neodgovorena pitanja, na često postavljana pitanja, koja zanimaju vašu ciljnu grupu.

Ovde možete pretražiti trendove pretraga:

- https://answerthepublic.com/
- https://trends.google.com/trends/?geo=RS
    - https://trends.google.com/trends/explore?date=today%205-y&geo=RS&q=restoran%20beograd,dostava%20beograd

Dobri Primeri

- Geek shop za prodaju rančeva boban, odnosno XD-design
  - Razlika u prikazivanju sadržaja na osnovu predznanja posetioca, zašto nije nužno dobro kopirati najveće lidere na tržištu.
- Kickstarter kampanje
- GOOD Meat
- Rimac Automobili, Tesla
  - Razlika u pristupu i korišćenju interakcija
- Digitalocean
- Starbucks
- Netflix

Pitanja

Yoast za još bolje rangiranje na pretraživačima

https://www.youtube.com/watch?v=y59a0Yujziw

Napomena: kada radite promene koje su prikazane u videu, kliknite save pre nego što promenite sekciju podešavanja.
U većini slučajeva takmičara treba ostaviti indeksiranje “pages”, “exceprt” opcija bi trebala da vam radi sasvim dobro, tako da u većini slučajeva nije potrebno ručno unositi tekstove.

Kako uključiti Google Analitiku

https://www.youtube.com/watch?v=gEX0iprwMwc

Napomena: na prezentaciji smo pogledali kako izgleda google analitika kada se gleda na https://analytics.google.com/
Pregled preko ovog linka je malo kompleksniji od ovog koji je prikazan u videu, ali vam može ponuditi više informacija i opcija. Preporuka je da koristite oba i vidite šta vam više odgovara.

Snimanje poseta korisnika - Mouseflow/HotJar

Na prezentaciji smo pogledali nekoliko alata za snimanje poseta korisnika poput Mouseflow i HotJar-a.
Njihova instalacija je vrlo jednostavna, ALI da bi oni lepo radili, neophodno je da imate podešen HTTPS, odnosno SSL sertifikat, što ne možete da uradite na besplatnom hostingu koji koristimo.

Mouseflow je lakši za korišćenje od strane početnika.
Prvi korak je da se registrujete na mouseflow.com:

Nakon toga, popunite osnovne podatke:

U 3. Koraku unesite u gornje polje adresu vašeg sajta,
A u donje polje tip sajta (verovatno company website):

Konačno, kliknite install i ispratite tutorial dostupan na https://help.mouseflow.com/en/articles/4304805-install-mouseflow-using-our-wordpress-plugin od koraka odabira Wordpress-a:

Preseljenje (Migracija) na novi hosting (opciono)

Nakon što ste isprobali razne mogućnosti i podesili da vam sajt izgleda kako vam odgovara, moguće je da želite da se prebacite na novi pouzdaniji plaćeni hosting sa SSL sertifikatima i cPanelom. Ovaj korak nije neophodan, posebno zato što vam ovaj hosting omogućava da besplatno koristite i zvanične registrovane domene.

Jedna mogućnost je da sve uradite ponovo na novom hostingu, što je u redu, ako svakako niste zadovoljni u potpunosti onime što ste uradili i želite da to izmenite u nekoj meri.

Druga mogućnost je da odradite kompletno preseljenje sajta. To radite tako što instalirate wordpress ponovo na novom sajtu, otvorite Admin panel i na starom (infinity free) i na novom (plaćenom) hostingu i ispratite tutorijal na: https://www.youtube.com/watch?v=kpsjTPsygbs ili https://www.youtube.com/watch?v=_vR0oD_Nux0 (oba tutorijala su u redu)
